Ruben Melkonyan - Director of Finance, Executive Board member
<b>c) Major Participants</b>
MFM Global Invest AG – 75 %

Home for youth UCO CJSC – 25 %

**d) Management Remuneration Policy**

Remuneration of the Management is provided in accordance with signed employment contracts and the staff list approved by the Board of the Bank.

**Note 2. Accounting Policy**

**2.1 Preparation of financial statements**

The Bank prepares its financial statements in accordance with the International Financial Reporting standards (IFRS), other legal acts regulating the accounting, and the requirements of the accounting policy approved by the Board of the Bank.

**2.2 Going Concern**

The financial statements have been prepared on a going concern basis which assumes that the Bank's assets should be realised and obligations met during the time of the Bank's operation.

**2.3 Comparability**

The comparable numbers have been adjusted where required to ensure the comparability with the numbers of the current period.

**2.4 Recognition of income and expense**

*2.4.1 Interest income and expense*

Interest income and interest expense in the Statement of Comprehensive Income are recognized on the accrual basis using the effective interest method.

*2.4.2 Commissions and other income and expense*

Loan origination fees together with correspondent expenses are deferred as an adjustment to the effective yield of the loans. Fees, other income and expense are recognized on an accrual basis during the time of service provision.

**2.5 Foreign currency transactions**

Foreign currency transactions are translated to the functional currency using the exchange rate as of the transaction date. Monetary assets and liabilities denominated in foreign currency are translated to the functional currency using the exchange rate established as of the balance sheet date.

Gain and loss resulting from the difference between the exchange rate provided by the contract concerning the transaction and the exchange rate as of the transaction date are accounted for in the Statement of Comprehensive Income as a line item "net income from sale and purchase of foreign currency" in net trading income.

The following exchange rates were used by the Bank when preparing the financial statements:

	30-Sep-23	31-Dec-22
AMD/1 US Dollar	393.4	393.57
AMD/1 EUR	417.4	420.06

**2.6 Cash and cash equivalents**

Cash and cash equivalents comprise cash on hand, demand amounts of correspondent banks, balances with the CBA (excluding funds deposited for the settlement of ArCa payment cards), which can be converted into cash at short notice and which are subject to an insignificant risk of changes in value.

**2.7 Amounts due from other banks**

In the normal course of business, the Bank maintains current and deposits accounts opened with other banks for various periods of time.

**2.8 Securities**

On initial recognition, financial assets at fair value through other comprehensive income are accounted for at initial cost and thereafter remeasured at fair value. When revaluating at fair value, the revaluation result is reflected in the equity

**2.9 Loans and advances to customers at amortized value**

Loans and advances are financial assets with fixed payments, which arise when the Bank provides money directly to a debtor with no intention of trading the receivable. Loans granted by the Bank with fixed maturities are initially recognized at fair value plus related transaction costs. Subsequently, loans and advances are measured at amortized cost using the effective interest method. Loans and advances to customers at amortized value are carried net of any allowance for impairment losses.

## 2.10 Leasing

Lease payments under an operating lease are recognised in the statement of financial results as expenses according to IFRS 16.

## 2.11 Possible losses reserve

The Bank makes an impairment assessment for financial assets or a group of financial assets as of the each balance sheet date.

## 2.12 Intangible assets

Intangible assets include computer software, licences and similar items. Intangible assets acquired separately are initially recognized at cost. After initial recognition, intangible assets are carried at cost less accumulated amortisation or impairment losses. Intangible assets can have either an identifiable or indefinite useful life. Intangible assets with identifiable useful lives are amortized on a straight-line basis over their useful life, that is 15 years. Intangible assets with indefinite useful lives are not amortized, they are reassessed each year for impairment.

## 2.13 Property, plant and equipment

Property, plant and equipment ("PPE") are recorded at historical cost less accumulated depreciation.

Depreciation is calculated using the straight-line method based on the estimated useful life of the asset. The following depreciation annual rates have been applied:

	Useful life
	(years)
Buildings	30
Computers	3
Transportation means	8
Automatic teller machines	10
Other PPE	8
Property and office equipment	8

Leasehold improvements are capitalized and depreciated over the shorter of the lease term and their useful lives on a straight-line basis.

The expenditures as regards PPE repairs and maintenance are recognized as an expense in the statement of financial results during the period in which they are incurred.

## 2.14 Financial instruments

The Bank implements measurement, recognition, use and accounting for the financial instruments according to the order established by the RA legislation as well as the regulations, decrees, orders and acts issued by the Bank.

## 2.15 Events occurring after the balance sheet date

2.15.1 In case material errors revealed by the auditor result from the differences between the requirements of the International Accounting Standards and RA legislation, then the accounting records are made in accordance with the decisions taken by the managing bodies of the Bank.

2.15.2 In case material errors appear or are revealed after publication of the Bank's annual financial statements according to the established order, then no adjustments are made, and it is considered that repeated presentation of similar information is impracticable.

## 2.16 Taxation

Income tax on the profit for the reporting year comprises current and deferred taxes. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to taxes paid in respect of previous years. Deferred taxes are calculated taking into account all the temporary differences arising between carrying values of assets and liabilities recognized in the financial statements and the amounts calculated for taxation purposes.

The Bank pays also other taxes during the course of its activity. These taxes are included as a component of other expenses in the statement of comprehensive financial results

### 2.17 Functional and presentation currency

The national currency of the Republic of Armenia is RA Dram (AMD). For the purposes of these financial statements, RA Dram is the presentation currency as well.

The intermediary financial statements are presented in thousands of AMD.

#### Note 36. Minimal disclosures concerning financial risks

##### 1. Credit risk

The main objective of credit risks management for the Bank is the timely (sometimes even before provision of the loan) identification, valuation and realization of corresponding steps directed to their reduction.

The Bank evaluates the credit risk in relation of both each borrower and the whole loan portfolio.

According to the methodology developed by the Bank, the creditworthiness of the potential borrower is assessed before provision of the loan. From the viewpoint of prevention of the credit risk, the most important principles to follow are considered to be the security and purpose of the loan. After provision of the loan, monitoring is conducted by the Bank during the whole period of the loan agreement to regularly assess the borrower's solvency and the loan's security as well as to take corresponding measures for restricting the possible credit risk.

Also the Bank's overall loan portfolio is subjected to regular analysis by industry branches, customers, and loan types to ensure the portfolio diversification and quality. Intra-bank normatives restricting credit risk (maximum risk as regards an industry branch, maximum overall loan risk, maximum risk per individual loan types as regards loan portfolio quality, maximum risk as regards a borrower, maximum risk as regards the major borrowers, maximum risk as regards a person related to the Bank, maximum risk as regards all persons related to the Bank, etc.) are established by the corresponding internal legal acts approved by the Bank Board (these normatives are more severe than the corresponding normatives established by the RA Central Bank).

The Bank considers activity of the Loan committee as very important for the containment of credit risk. Loan committee is the body to realize the Bank's credit policy, the purpose of which is management of the Bank's loan activity and formation of the quality loan portfolio. The main objective of the loan committee is making collective professional protocol or final decisions concerning realization and servicing of transactions containing credit risk.

#### Market risk

#### Currency risk

For the purposes of currency risk assessment, the Bank applies the VaR (Value at Risk) model well accepted in the international practice. The model ensures definite probability forecast of expected maximum currency fluctuation rate by calculating the maximum value of the Bank eventual losses. For the purposes of currency risk suppression the Bank carried out daily monitoring of currency positions. In the occurrence of open currency positions, the Bank applies hedging instruments for the purposes of risk avoidance.

Interest rate risk

Efficient assets and liabilities management also assumes a management of assets and liabilities as a result of which the Bank will to the extent possible avoid interest rate risk.

The objective of the interest rate risk management at the Bank is to maintain the target levels of the assets and liabilities interest rate spread and net interest margin.

For the interest rate risk management purposes, the Bank makes calculations on the monthly basis of the both net interest margin and the assets and liabilities interest rate spread, taking into account the assets profitability and the liabilities consumability as well as their time limitation.

To restrict interest rate risk, special mechanisms have been developed as regards assets and liabilities pricing (setting interest rates).

Interest rate risk assessment is based on the model of time gap calculation for assets and liabilities sensitive towards interest rate changes, which allows to evaluate the effect of the interest rate changes on the Bank's expected net interest income.

Interest rate risk is also assessed using the duration method, which shows the change in the economic value of the capital as a result of interest rate changes, taking into account the time inconsistency of the involved liabilities and allocated assets.

#### Average interest rates for interest-bearing financial assets and liabilities as of the end of the reporting period

Item	Reporting period interest rates		Previous period interest rates	
	Drams	Foreign currency	Drams	Foreign currency
	%	%	%	%
<b>Assets</b>				
Balances with CBA				
Amounts due from banks and other financial organizations				
including				
- interbank loans		4.25-6.6		6.60
- interbank repo	4.35		11.15	
- interbank swap

Securities held for trading and available for sale	0-13	5.95-7.5	6.5-13	5.95-7.5
Securities held to maturity	9.75-13		8.0-11.5	
<b>Liabilities</b>				
Amounts due to banks and other financial institutions	1-10.77	4.20-4.35	1-9.60	3.5-4.5
Amounts due to customers	0.00-10.75	0.00-6.0	0.01-10.75	0.01-6.00
Liabilities as regards securities issued by the Bank	0.00	5.8-6.6366	10.50	5.8-6.6366

#### Liquidity risk

The purpose of the Bank's liquidity management is to create an integrity of financial potential, which will enable to meet the well founded money demands of all types of creditors, depositors and other customers without serious problems which may be reflected in the Bank's balance sheet and off-balance sheet items, as well as ensuring the maximum possible profitability level.

To ensure smooth liquidity and efficiently manage the liquidity risk, the Bank implements coordinated management of assets and liabilities, which assumes:

1. availability of sufficient number of highly liquid assets,
2. sustainability of resources,
3. acceptable time gaps for assets and liabilities,
4. possibilities to attract means from external sources.

For correct decision-making concerning the Bank's liquidity management, it is especially important to carry out a time analysis for assets and liabilities, which is implemented through the assets and liabilities time gap calculation model by instant and cumulative separations. Instant liquidity is calculated on the daily basis to make correct situational decisions.
